

Township of Woolwich Notice of Study Commencement Elmira Area 3B Pumping Station and Forcemain Routing

The Corporation of the Township of Woolwich is initiating a study to identify a preferred wastewater pump station location and forcemain alignment to service the proposed development for Area 3B, known as the Lunor Development, in Elmira. This study will be conducted in accordance with the Municipal Class Environmental Assessment.

The study will identify potential pump station locations and forcemain alignments and evaluate the alternatives. The capacity of the pump station will be determined and impacts in the downstream collection system will be assessed. The result of this study will be the selection of a preferred pump station location and forcemain route.

An integral component of this study will be public consultation with various interested stakeholders (both public and regulatory agencies). One Public Open House will be held to present the project details and to collect community feedback and input before finalizing the preferred strategy. The Open House is expected to be held in September 2011. Details regarding this meeting will be advertised as the study progresses.

A mailing list for notification purposes is being prepared. If you are interested in being placed on the project mailing list to receive future information, or if you have any questions, please contact either of the representatives listed below.
