4. Describe your Drinking-Water System

The Township of Woolwich owns and operates the Maryhill Heights distribution system, including pipes, valves and residential meters. The distribution system serves approximately 93 residential service connections with a population of approximately 147 people. The Maryhill distribution system does not serve any industrial properties. There are three hydrants located on the system that are used for swabbing purposes and are not adequate for fire protection.

The Maryhill distribution system receives water from the Maryhill Heights Water Treatment Plant, the Maryhill Water Treatment Plant is owned and operated by the Region of Waterloo.

The Township of Woolwich’s distribution system does not provide treatment to the water; therefore, there is no chlorine boosting, ultraviolet (UV) irradiation, secondary disinfection, and pressure boosting or pressure control within the control of the water distribution system.

5. List all water treatment chemicals used over this reporting period

Water treatment is the responsibility of the Region of Waterloo. The Region of Waterloo reports all the treatment chemicals used via their annual Water Quality Reports. The Township of Woolwich disinfects all parts, material and pipe during new installation and repair.

6. Were any significant expenses incurred to?

- Install required equipment
- Repair required equipment
- Replace required equipment

7. Please provide a brief description and a breakdown of monetary expenses incurred

A new subdivision was constructed that included installation of watermain and laterals for 34 residential lots. There are no homes yet completed in this subdivision, to impact population totals. This does however increase the number of laterals from 49 to 93. There have also been 2 fire hydrants installed that are not adequate for fire protection.
