RESIDENT NOTIFICATION No. 1  
JUNE 16, 2020

RE: STRUCTURE 161262 REHABILITATION  
MIDDLEBROOK ROAD

The Township of Woolwich, through their consultant GM BluePlan Engineering Limited, has completed the design and tender for the Structure 161262 Rehabilitation – Middlebrook Road project.

**General Information**
Structure 161262 is located on Middlebrook Road approximately 1.59 kilometers north of Balsam Grove Road near 6664 Middlebrook Road. The existing open footing reinforced concrete structure has a span of 2.4 metres and is 23.5 metres wide. The existing structure consists of four individual segments; an original interior segment, and three extensions.

The structure is in overall fair to poor condition. This condition is a result of the age of the original interior segment, and erosion of the existing stream bed material. The 2019 Ontario Structure Inspection Manual (OSIM) Report recommended the culvert be rehabilitated in 1 to 5 years.

The project was issued for tender in April of this year and the contract award report was approved by Township of Woolwich Council on June 2, 2020, with Jarlian Construction Inc. being selected to complete the work. Construction is anticipated to commence on or about July 2nd, 2020.

The structure rehabilitation will require that Middlebrook Road be closed at the structure location for approximately 5 weeks. A detour route will be established to direct vehicles around the work zone. The detour route will remain in effect for the duration of the project. Please refer to the enclosed map for details.

**Site Safety**
Occupational Health & Safety Act regulations will be adhered to during this project; the Contractor will ensure site safety. We request the cooperation with parents to help ensure the safety of their children during the construction. Please be aware that children shall not play within the construction zone at any time.

**Garbage and Recycling**
Garbage and recycling will continue as usual; however, there may be times where the Contractor may have to transport your containers for pickup. Please clearly mark your address on your garbage and recycling containers to ensure that they are returned to you.

**Emergency Services**
Ongoing communication will occur with emergency service providers to ensure that they are aware of construction activities and are informed with respect to access and any road closures.
Mail Service
Canada Post will be notified of the construction project and it is expected that delivery of your mail will continue as normal. Should mail service be affected, for whatever reason, a notification will be issued providing information on how to receive your mail.

Hours of Work
Work will generally occur Monday to Friday between 7:00am and 7:00pm. There may be times when the Contractor is required to work on Saturdays in order to adhere to the construction schedule. Should this be necessary, the hours of operation would be between 8:00am and 5:00pm.

Should you have any questions or concerns, please do not hesitate to contact the following:
