WILLIAM ST. RECONSTRUCTION PROJECT
NEWSLETTER No. 2
APRIL 25, 2019

Schedule

Gedco Excavating mobilized to William Street the week of April 15th and commenced preparatory work as planned. This week, during the night work in the intersection of Arthur Street, problems arose with the locations of some old pipes, necessitating relocations to allow the new pipes and structures to be installed. Since this unexpected work will take additional time, the schedule for night work has been extended to Monday and Tuesday April 29th and 30th from 7:00 p.m. through 6:00 a.m.

Emergency Vehicle Access

Ongoing communication is occurring with emergency service providers to ensure that they are aware of the construction activity and are kept up to date with respect to access and any temporary road closures.

Service Interruptions

The work on Arthur Street is very localized and due to the configuration of the underground services, no interruptions of service to homes are expected.

Noise

Similar to the two nights of work completed, construction noise will occur on the two extended nights. As before, the Contractor works to minimize noise as much as possible by not slamming truck tailgates, minimizing backing up vehicles with beepers, shutting off heavy equipment when possible, etc. These efforts should keep noise levels reasonable for most of the night.
Communication

If you have any questions or concerns during the course of this project, please contact the people noted below. Site representative Paul Gregorio will be aware of current conditions and will be your best contact for site related issues.
