Continuation of Work

The Township considers any outstanding and deficient work to be essential to completing the critical infrastructure on William Street. To that end, our contractor, Gedco Excavating Ltd. is preparing to mobilize to William Street the week of April 27, 2020, weather permitting, to continue their work from last year, including adjustment to sewer pipes at specific locations in the road allowance, and completion of the topsoil and sod which is planned to start the week of May 04th. All work is expected to be complete by May 29th.

Health and Safety

In accordance with Ministry requirements, the Contractor will follow worker health and safety regulations including the provision of worker monitoring and cleansing, and will follow distancing rules.

The planned work is not expected to interrupt municipal services or require workers to enter any homes. If a situation does arise where entry is necessary, the resident will be contacted in advance and a procedure will be developed to protect all parties.

Any residents outside are asked to avoid the construction area and not approach workers.

Patrick Grier, P.Eng. (cell: 226-755-2899)

Vehicle Access

Localized road closures will be required for short periods (a day or less) and may require residents to approach their home from a different direction while work is in progress. Ongoing communication is occurring with emergency service providers to ensure that
they are aware of the construction activity and are kept up to date with respect to access.

**Communication**

If you have any questions or concerns during the course of this work, please contact the people noted below.
