

Statement regarding conflict of interest

I have no conflict of interest vis-à-vis Chemtura in the Township of Woolwich or in Canada in general. While it is possible that I may own mutual funds that have or are invested in Chemtura, I have no knowledge of any such investments and leave annual changes in my retirement funds to my advisor. I have never worked for Chemtura, Uniroyal Chemical or any related company.

Since graduating in 1996 with my Masters of Science in Hydrogeology from the University of Waterloo, I have not engaged in any work that could be interpreted as being a conflict of interest for the purposes of serving as Chair of the Technical Advisory Group (TAG) to the Remediation Advisory Committee (RAC).

My work as a practicing geoscientist (hydrogeologist) has to date been limited to Canada, primarily in Ontario and has been focused on the management and protection of groundwater resources.

Between May 1996 and April 2000, as a member of the Policy Research Group at the Ontario Federation of Agriculture, my responsibilities included protecting the water interests of Ontario agriculture including the issues and concerns raised by the Waterloo Federation of Agriculture (WFA).

From April 2000 to present, I've been engaged as a professional geoscientist (hydrogeologist) for BluMetric Environmental Inc. (BluMetric™) (formerly WESA Group Inc.). While I have not personally completed any environmental assignments within the jurisdiction of the Township of Woolwich, BluMetric™ has and may in the future do work within the Township of Woolwich which requires a familiarity with the soil and groundwater conditions associated with the Chemtura property. However, at no time has BluMetric™ been engaged by Chemtura, Uniroyal Chemical or any related company.
