

SANDY HILLS PINERY TRAILS
 (North and South)

Trail length:
 South Trail: 1.7 km loop
 North Trail: 1.1 Loop/linear

Three trails meander through 2 stands of pine trees designated as Waterloo Region Agreement Forest. The land was purchased by Waterloo County in 1945 and the red pine stand planted to prevent erosion of the sandy soil.

The Sandy Hills Pinery Trails are located north of Elmira in a pine plantation-type woodland managed by the Region of Waterloo. These trails are easy, single track sand/gravel trails with some areas of double track width. The side trails are somewhat narrower and traverse more varied elevation. There are few to no wet areas, but cyclists are cautioned on areas of loose, deep sand.

This trail is not winter maintained.
